

Radiation characteristics for B0950+08 and it's baseline analysis

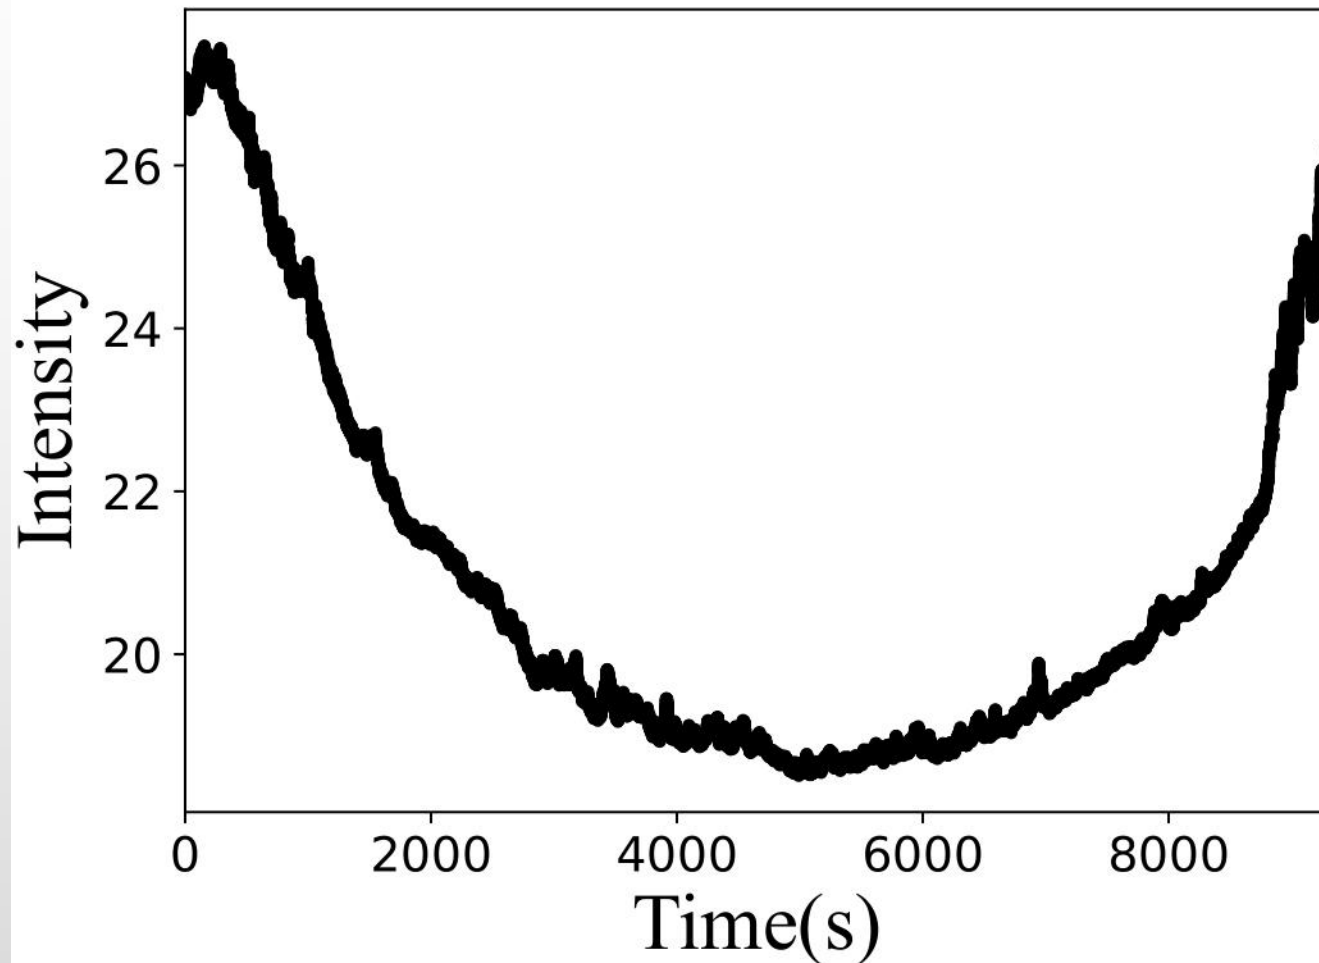

Zhengli Wang(王正理)

Guangxi University

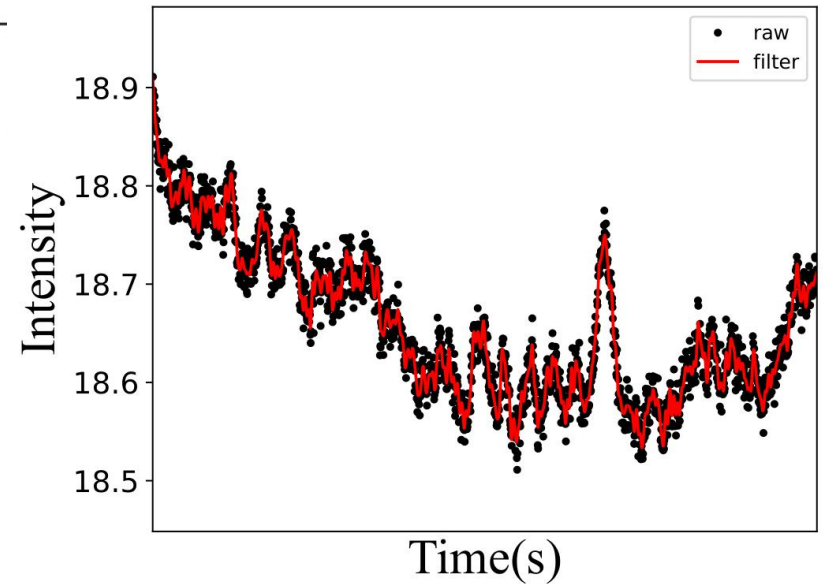

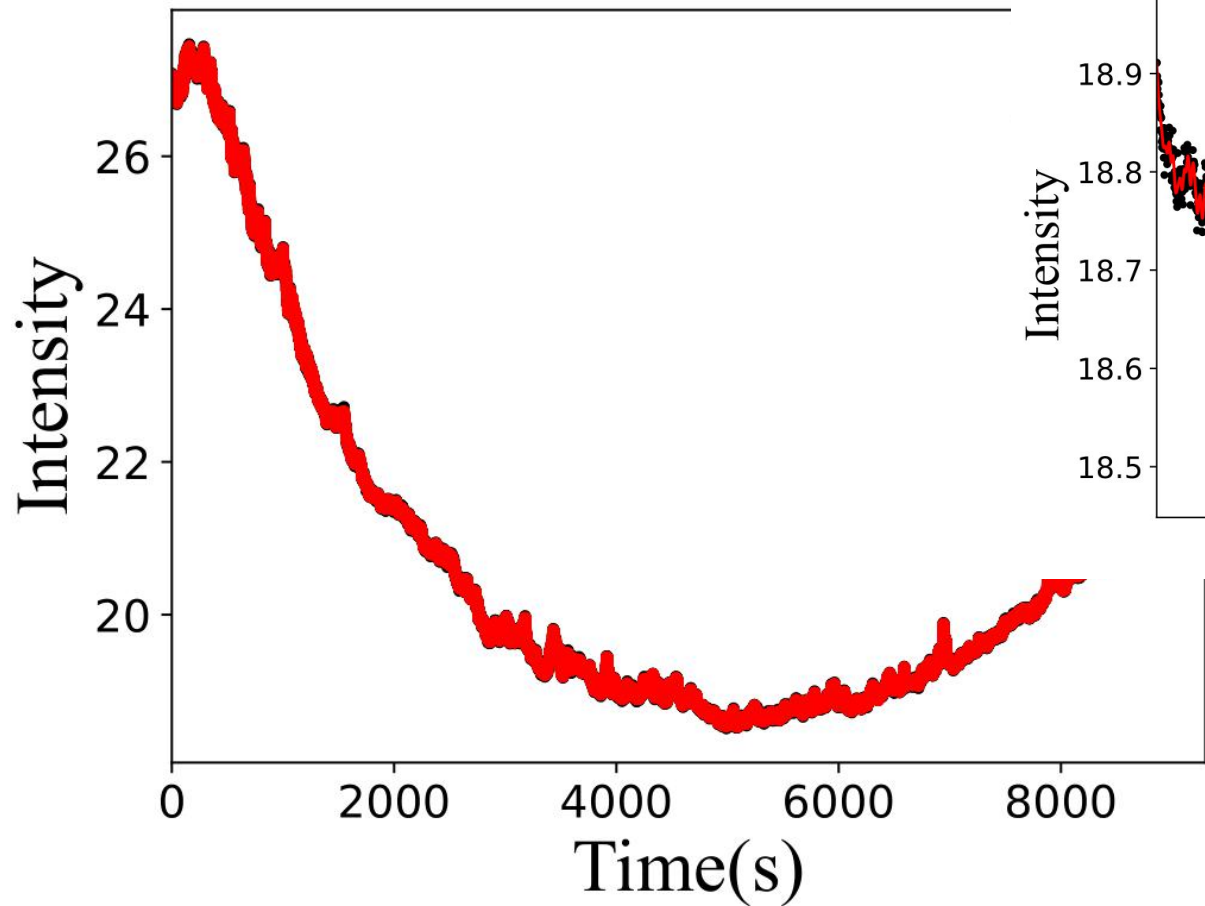

Radiation characteristics for B0950+08

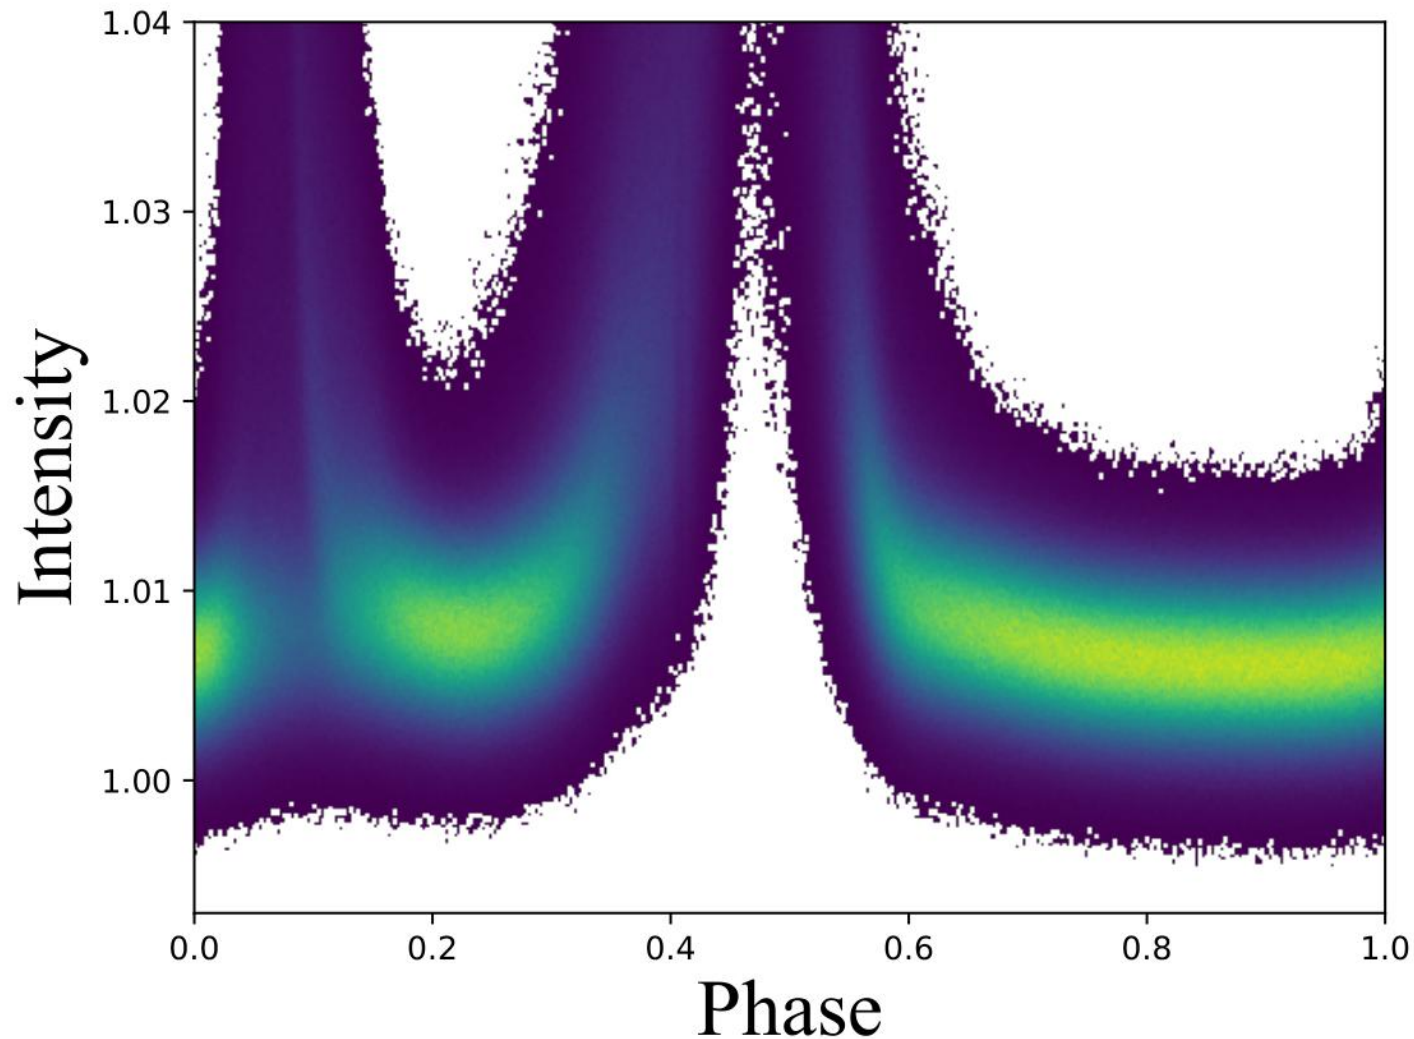

The weighted intensity for minimum 10 points in each pulse of B0950+08

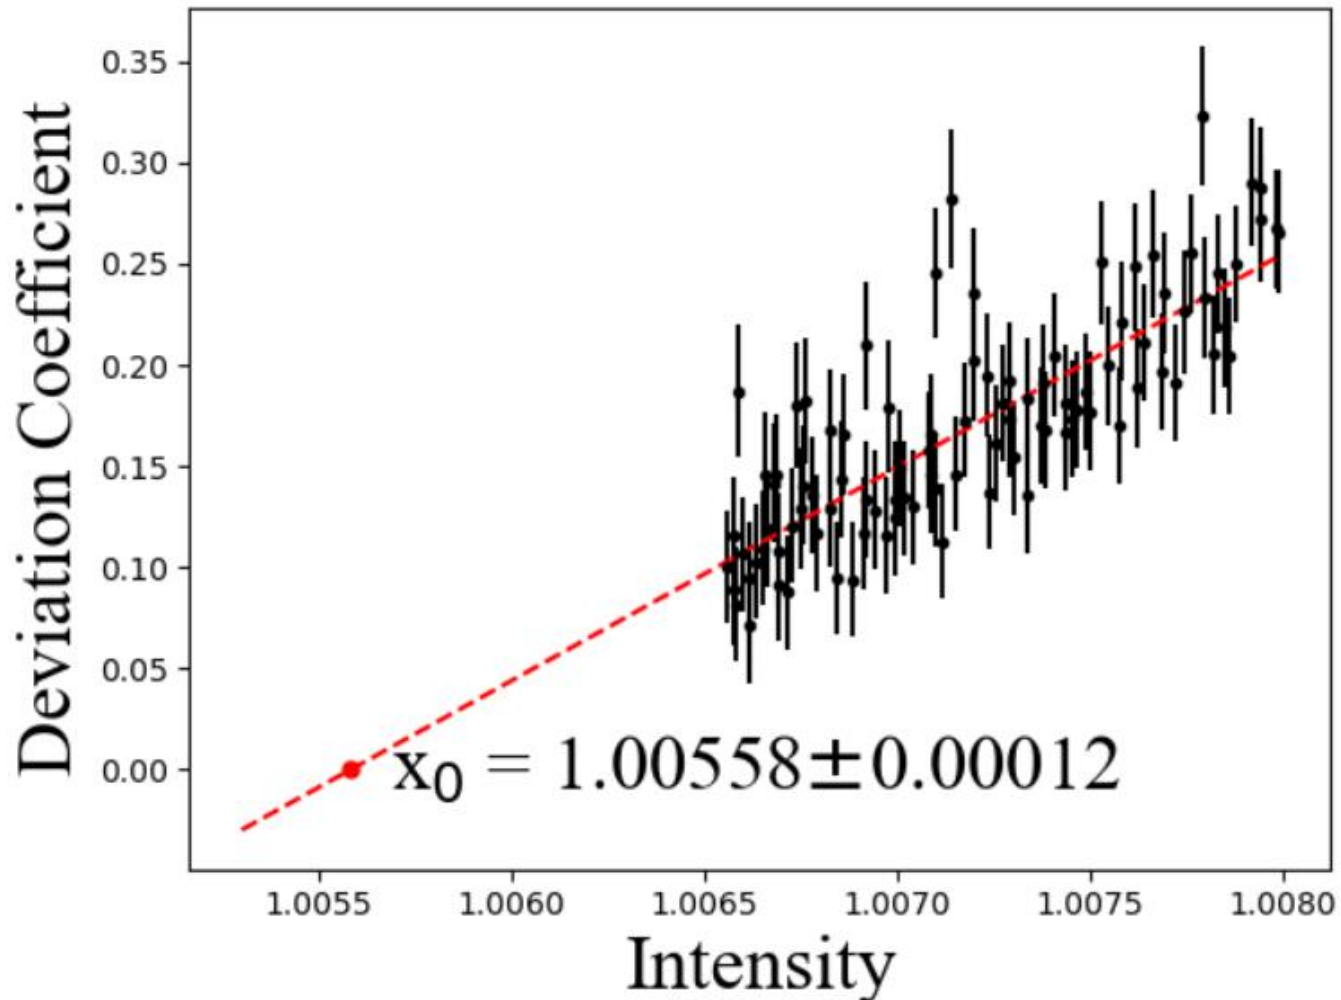

The low-pass filtered curve

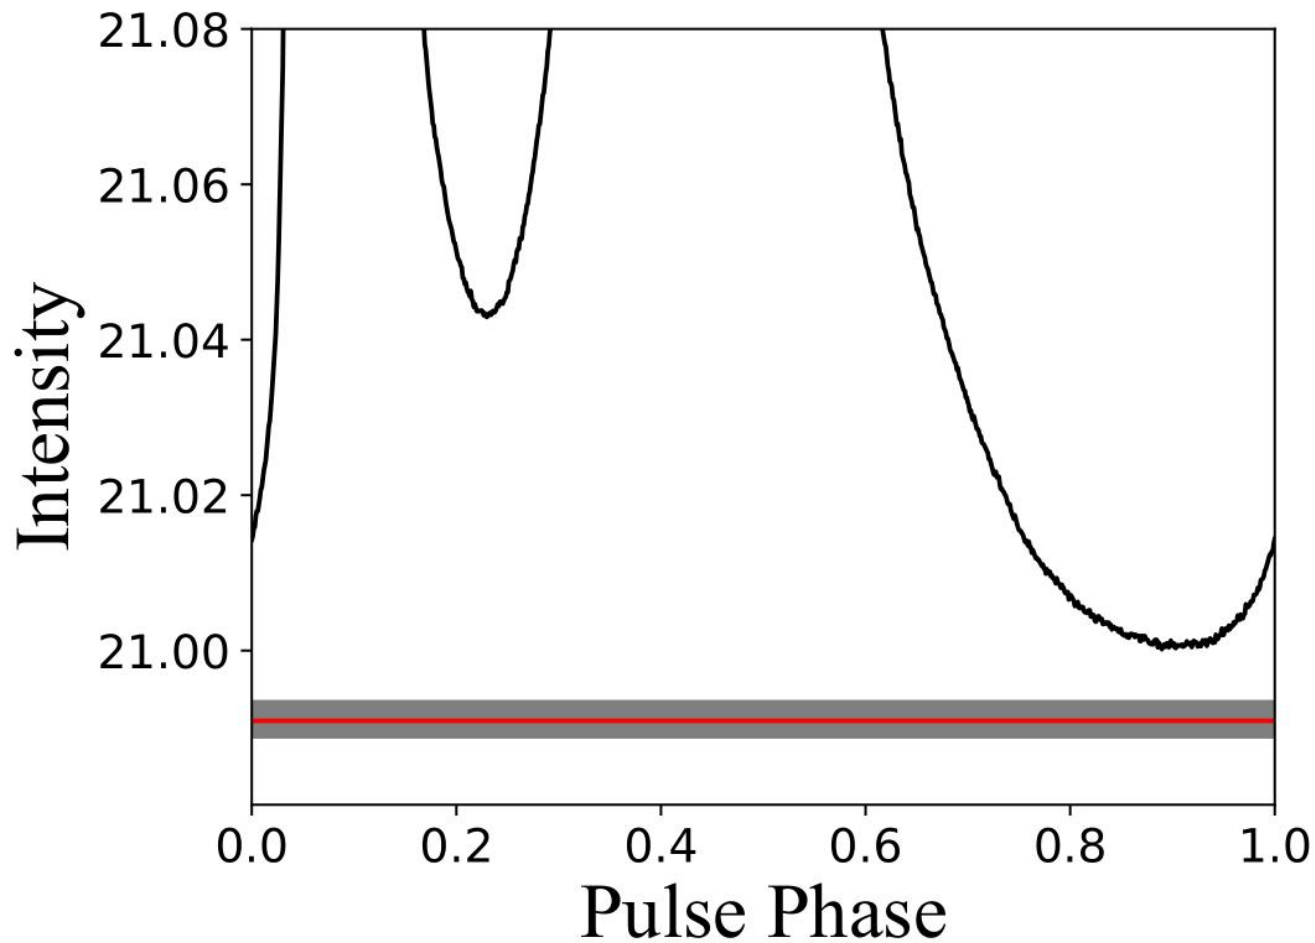

The intensity distribution for each pulse phase bin

The linear correlation between mean intensity and deviation coefficient

The baseline for integrated profile

That's all.

Thank you !
